Objective

To design human-centered interface with industry standards and make it intuitive is the what I look up to when it comes to Human-Computer Interaction. I cite my past developing/design experience and astute observational skills as my inspiration towards design. Currently looking for summer internship/co-op opportunities.

Education

Rochester Institute Of Technology

MS | Human Computer Interaction

RELATED COURSEWORK
Foundations Of HCI

Info and Interaction Design

Mobile HCI

Research Methods

Usability Testing

Skills

Interaction Design | User Research Rapid Prototyping | Responsive Design | Usability Design | User Research | Logo Designing | Paper Prototype | Paper & Pencil | HTML CSS | Javascript | Ruby | Action Script 3

Experience

Interaction Designer | RIT
AUG 2015 - DEC 2015

Conceptualized and redesigned a smart TV application by incorporating new user interaction techniques. The need for these techniques were extensively researched and implemented which addressed user problems like typing and navigation while watching TV.

UX Designer | Vertis Microsystems LLP
DEC 2014 - JUL 2015

Sheqscan is a tool with the help of which one could easily customise checklists, assign them to users. I created wireframes and hifi prototype for a web and mobile application.

UX Designer | Vertis Microsystems LLP
JUN 2014 - NOV 2014

A mobile application and web application used in the universities for safety in case of lockdown. Created wireframes and screens making them responsive for large and small size of screen.

UX Developer | Vertis Microsystems LLP
SEP 2011 - MAY 2014

Well versed with javascript coding. Implemented MVC framework like Backbone JS. Proficient in RequireJS which is AMD Module. Proficient in Ruby for Server side coding.

Software

Photoshop | Illustrator | InDesign | Balsamiq | Lightroom
